## NHS SUPPLY CHAIN

Dear Angela Timms,

### Introducing the Invisible Nose Mask Pit

An Epoch-making invention, the next best thing since the toast maker was invented and it's natural.

The Nose Mask Pit Series product is produced without any drug enhancement. This makes the Invisible Nose Mask a natural immune system enhancer effective for Airborne Particles, Pollen, Allergy and highly recommended for Hay fever sufferers, it works without any side effect and can also be used during pregnancy.

The Invisible Nose Mask Pit series has been proven highly efficient and effective against:

- Airborne Particles
- Pollen & Hay fever Allergens
- Runny Nose & Nose Bleeding
- Yellow Sand Dust PM2.5 upto 0.1µm protection

This remarkable and stylish product has been tested by Japan Spinner's Inspecting Foundation (JSIF) and the test shows that 99.9% of pollen is blocked by the mask also the test carried out by KAKEN in Japan proves conclusive to 99.8% see certificates attached. AllergyUK a leading national charity providing support for those with allergies has endorsed and recognized the Nose Mask Pit as an Allergy Friendly Product, see certificate attached.

Other areas of application are not limited to:

- Tree Pollen
- Reduction of Household dust associated with Asthma triggers
- Viral and Virus Agents
- Minute Substances in Crowds and droplets

We would like to work with your distribution team to show how consistent and realistically cost effective this product can help with airborne purification product in the areas of airborne particles, Pollen and Hay fever reductions etc.

We're certain that what we bring you today is a game changer when compared with the conventional face mask which is cumbersome to wear and hope that you will consider a trial opportunity.

The product is cost effective while providing substantial benefits to the user as OTC.

We have attached product informations, should you require demonstration or samples to help you evaluate the product benefits please don't hesitate to contact us.

Yours Sincerely,

Chris Ok'Onkwo  
Operations Manager (EU/Africa)

# INVISIBLE NOSE MASK FOR FRONTLINE AIR PURIFICATION

## People

- The Invisible Nose Mask product will help ensure that users & workforce are fit and healthy by reducing seasonal sickness of airborne virus. It encourages trust among staff and employer while motivating frontline staff

## Helping develop a high performing team by giving sense of safety

- When issued as part of work uniform it enforces the idea of developing a team who understands that the employer is proactive in areas of health issues
- Actions taken toward impact shows an alternative to identify develop and deploy effective means of controlling issues. It shows our people that something is actively being done about the airborne virus and environmental quality

## Increase the flexibility of our workforce

- The Invisible Nose Mask product gives the workforce especially the frontline staff the flexibility and confidence when facing customers, knowing that reduction is in place for airborne viruses

## Develop & Deliver capability framework in delivery unit

- The Invisible Nose Mask product can be deployed under the uniform distributions framework through existing delivery channel or as a new innovation for ethical employer

## Improve safety

- The key aspect of this product is to improve safety by removing fear toward unsafe work practices, minimising lost time injuries and to achieve the goal of zero harm to health

## Safety in Predicting and preventing failures - improve condition

- This is innovative solutions and an approach to a cleaner air we breath
- The general consensus is that an innovative solution has been introduced to improve health and safety of everyone working on the network

## Improve health and safety at work

- Being first in the world to improve safety by reviewing procedures and implementing the safe system of work is a challenge but in most cases, starts with moments of trial acceptance
